Dear Abu Nashaat,

I believe the "thank you" must come from me. I have always felt safe in Jordan knowing that you are there to look out for me, and I mean as a citizen and not necessarily on a personal level, although I know that you always kept my interest safe and I thank you for that.

I remember very clearly being very irritated over the fodder issue and discussing it with you but you were so full of conviction that protecting the Jordanian tribesmen was also part of your mandate. You taught me a very valuable lesson that day and it has helped guide me every time I get upset or angry with being a Jordanian of Palestinian origin. I also remember how you handled the "muamarat" when you were prime minister and I am humbled. I remember your pleasant and measured tone at the most difficult of political junctures and it makes me measure my reactions whether politically or even personally.

***It has been truly an honour to know you but more importantly to learn from you. I believe you helped a whole generation of Jordanians of Palestinian origin to develop acceptance and find some peace with being Jordanian. Jordan will thank you for that!***

I hope you are well and have wonderful plans to enjoy the many many years to come. I am sure your contributions will never cease.

Best Regards and thank you again.

Nermeen
